U06E03 – MYSQL DataBase

Please follow the tutorial in:

https://www.w3schools.com/php/php_mysql_intro.asp

https://www.php.net/manual/es/book.mysql.php

Starting from the database and the example script, check that the entire environment works and that it shows you the data from the t-shirt table.

IMPORTANT: Include ON DELETE CASCADE in the Foreign KEY in the database creation script.

What to do

1. Create 3 different pages each one with the posibility of select a product (t-shirt, jumper, jeans). At the end must show the selections of the user.
2. Do the same as in the previous case but including all the functionality in one single script.
